### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: Application serial no. 10/695,646 is being allowed in view of the reasons set forth in the Office action mailed on June 26, 2007, and since none of the prior art of record teaches or fairly suggests a method of performing both calibration and quality control of a sensor for determining a parameter in a test fluid comprising the steps of performing a first calibration of the sensor using a reference material having a certain parameter level of the parameter, performing a quality control of the sensor, as calibrated, using another reference material having a different parameter level than in the reference material used in the first calibration, and performing a second, subsequent calibration of the sensor using the same reference material as used in the quality control step. Calibration and quality control, as used in the instant invention, are defined in paragraphs 0004 and 0005 on page 1 of the specification, i.e. calibration is defined as the experimental determination of the correspondence between sensor responses and predetermined parameter values of a reference material, whereas quality control is defined as the experimental verification that sensor measurements are accurate and/or precise by comparison of a measured parameter value of a reference material to an acceptance range of the same reference material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
